Identity

Output:

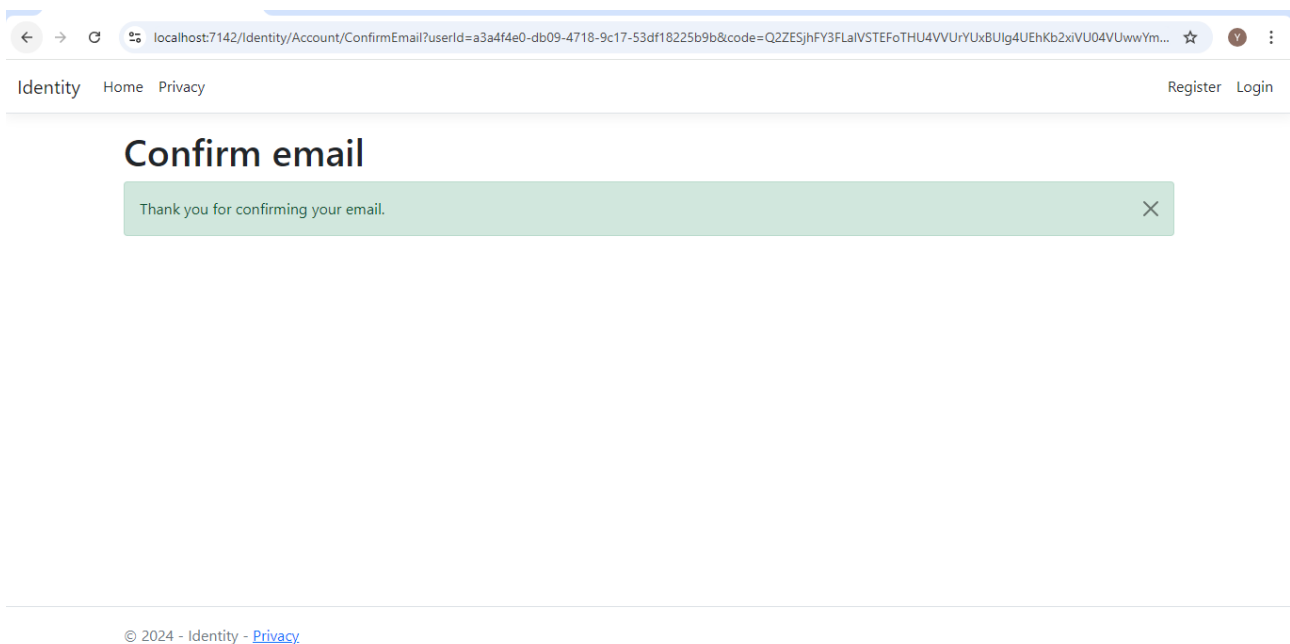

Register Page:

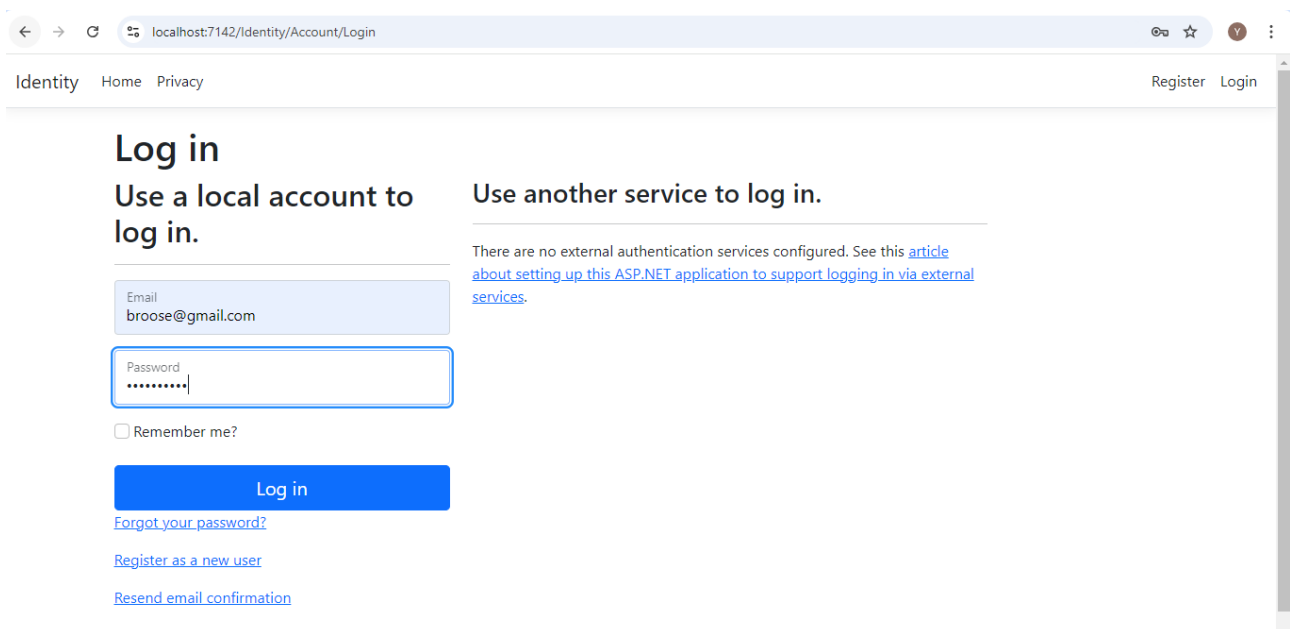

The screenshot shows the 'Register' page of an application. The browser address bar indicates the URL is 'localhost:7142/Identity/Account/Register'. The page has a navigation bar with 'Identity', 'Home', and 'Privacy' links, and 'Register' and 'Login' buttons. The main content area is titled 'Register' and 'Create a new account.' It features three input fields: 'Email' (containing 'broose@gmail.com'), 'Password' (masked with dots), and 'Confirm Password' (also masked). A blue 'Register' button is positioned below these fields. To the right, under the heading 'Use another service to register.', there is a message stating that no external authentication services are configured, with a link to an article about setting up external services. The footer shows '© 2024 - Identity - Privacy'.

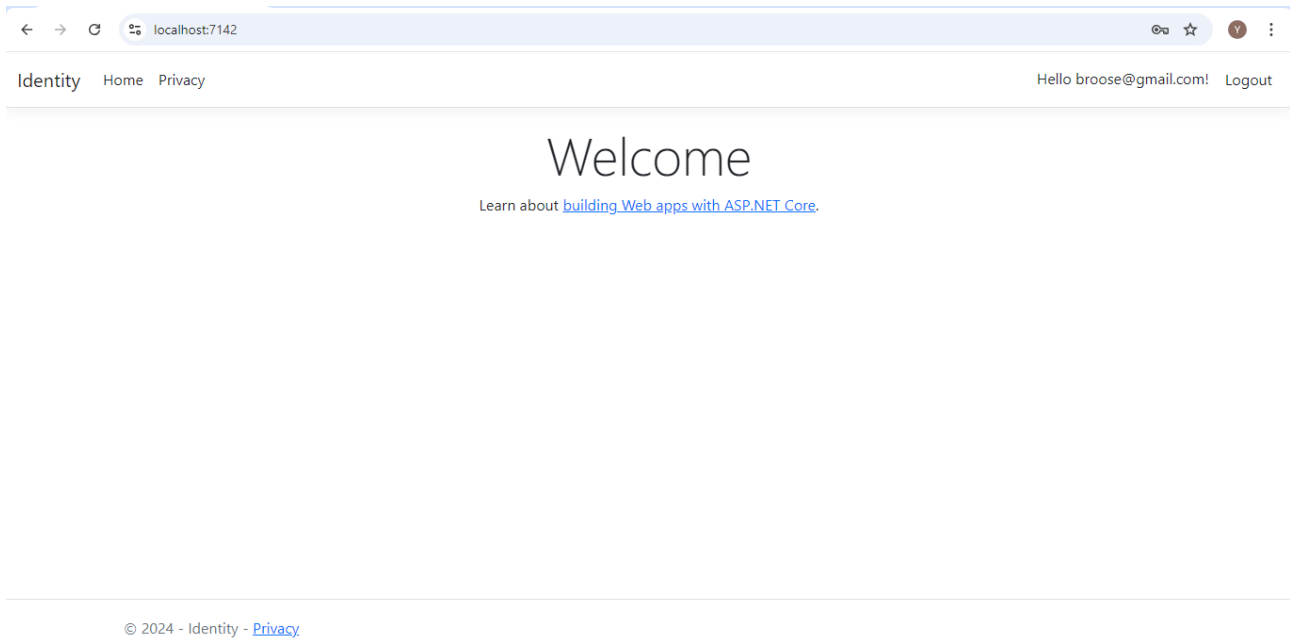

The screenshot shows the 'Register confirmation' page. The browser address bar indicates the URL is 'localhost:7142/Identity/Account/RegisterConfirmation?email=broose@gmail.com&returnUrl=%2F'. The page has the same navigation bar as the previous page. The main content area is titled 'Register confirmation' and contains a message stating that the app does not currently have a real email sender registered, with a link to 'these docs' for configuration. It also mentions that normally this would be emailed, with a link to 'Click here to confirm your account'. The footer shows '© 2024 - Identity - Privacy'.
